

pacSENSE

pacSENSE is a storage and archival solution for digital healthcare assets management. It's technically superior, standards compliant, cost effective one stop solution for Radiology departments and Healthcare institutions.

pacSENSE Features

- HL7, IHE, DICOM compliant
- Tele-Radiology Module
- Worklist Support
- Remote Administration
- Fault tolerant Hardware
- Diagnostic Quality Web & Mobile viewer
- Multiple Versions Supports All Modalities
- WADO Support (Accessing Images using http URL)
- Software (Zero Foot Print HTML5 DICOM Viewer)

Benefits

- Tele-Radiology facilitates quick and easy access to patient images and reports.
- With Tele-Radiology, Report can be performed anywhere, as results can be shared electronically with other remote facilities.
- Physicians can acquire a chronological view of patient's radiology histories.
- No space required for film storage

SANCY Berhad is a 100% Malaysian-owned company, established as a “Healthcare Solution Provider” with deep domain knowledge in the healthcare landscape.

We are driven by our focus to deliver “value-based healthcare solutions” at an affordable cost for the stakeholders in the healthcare industry.

Our healthcare solutions are built with inputs from industry veterans, clinicians, medical authorities and patients. Designed with intuitive user-interface, our modular products are scalable and easy to implement, making us the obvious choice for small, mid-sized and large private as well as public sector hospitals.
