

Asset Management

“Reduce Cost - Improve Operation”

WHY ASSET MANAGEMENT?

Assets are the foundation of nearly all business entities.

Estimates indicate that fixed Asset governs 80% of business operations.

Who requires Asset Management?

- How many types of Asset do you have?
- How much is the value of your Assets?
- Where is your Asset Located?
- Who is using your Asset now?
- How much do you spend on Maintenance?

If you **do not** know all the answers, then you essentially need SANCY - Asset System

SANCY Berhad is a 100% Malaysian-owned company, established as a “Healthcare Solution Provider” with deep domain knowledge in the healthcare landscape.

We are driven by our focus to deliver “value-based healthcare solutions” at an affordable cost for the stakeholders in the healthcare industry.

Our healthcare solutions are built with inputs from industry veterans, clinicians, medical authorities and patients. Designed with intuitive user-interface, our modular products are scalable and easy to implement, making us the obvious choice for small, mid-sized and large private as well as public sector hospitals.
